Project name : Quiz-IQ (Multipage Responsive Web)
Mentor name : Milek Agrawal(B-Tech 3rd year)
Dhyey Gami(B-Tech 2nd year)
Developer : Nilay Jayesh Shah(B-tech 1st year)
Name
Id : 201901026

1. Description:

- I make website which tells you about your mental age(IQ) by asking you some question.
- Based on your response it will give you score and your mental age and also give some another information about you.
- I developed it by Visual Studio Code software.
- Some images are downloaded [online](#).
- Some icons are downloaded for my information from [online](#).

2. Features:

- I made quiz-form for registration.
- I took some images from internet for making attractive website.
- I used some CSS style for look of website.
- I used JS for better user experience.

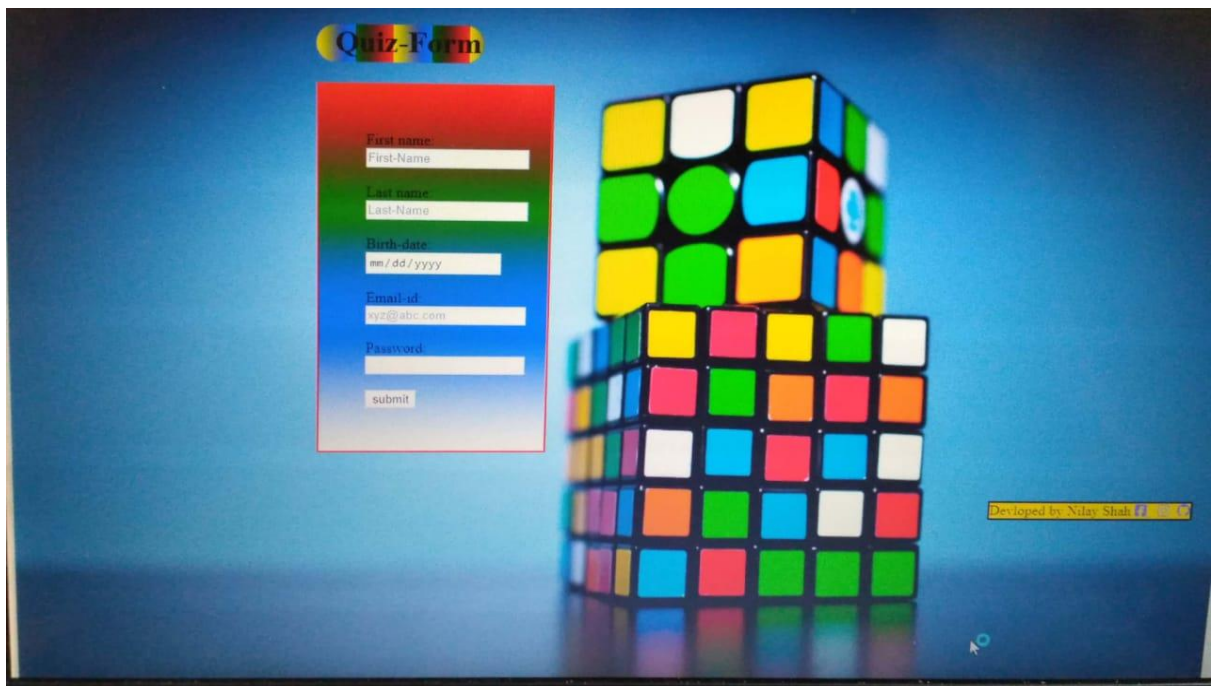

3. [Github link](#)

4. Experience:

- Overall experience is very good because I learnt some new stuff and used my vacation time to do some innovative things.

5. Screenshots:

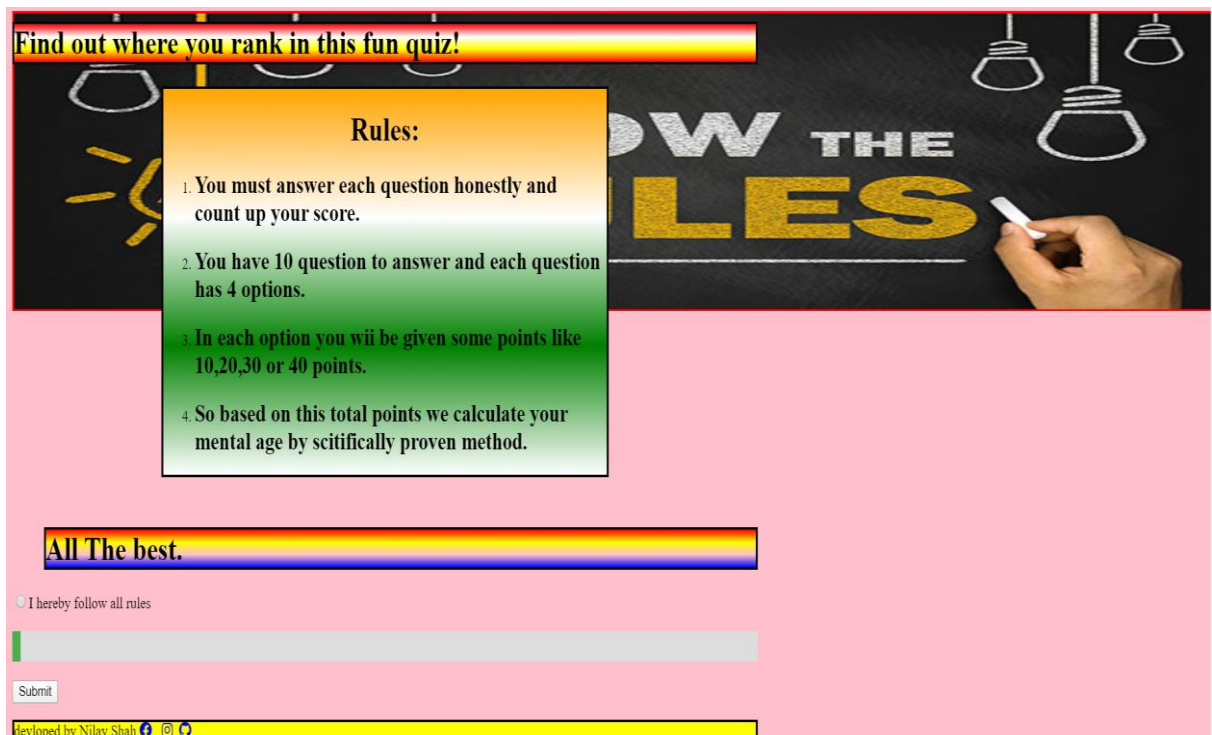

- Starting form to enter in quiz.

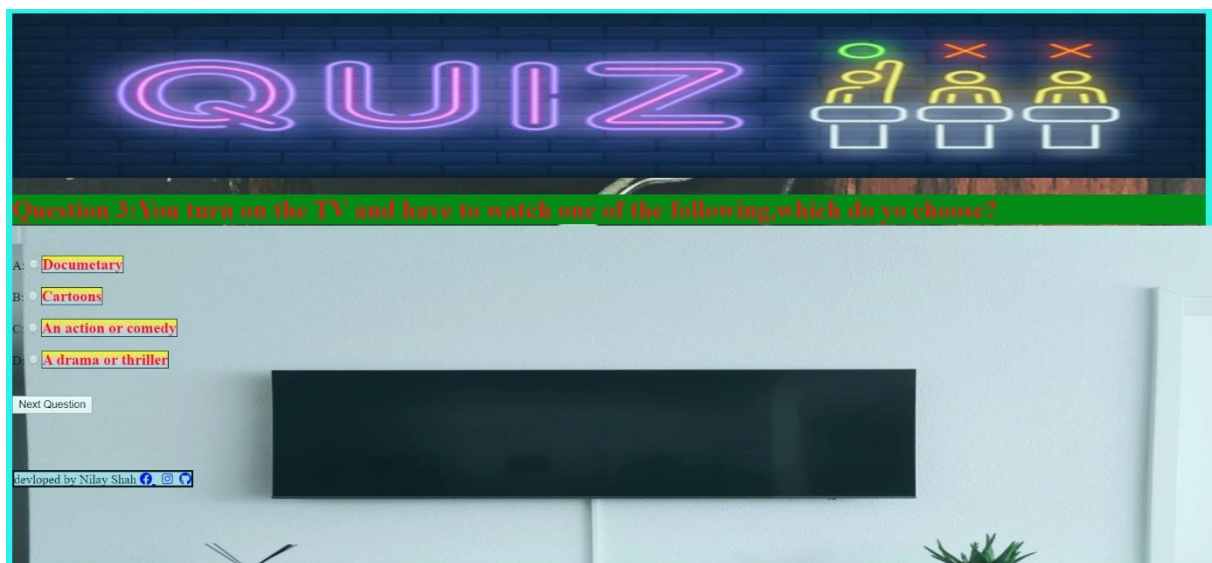

- Rules to must follow.

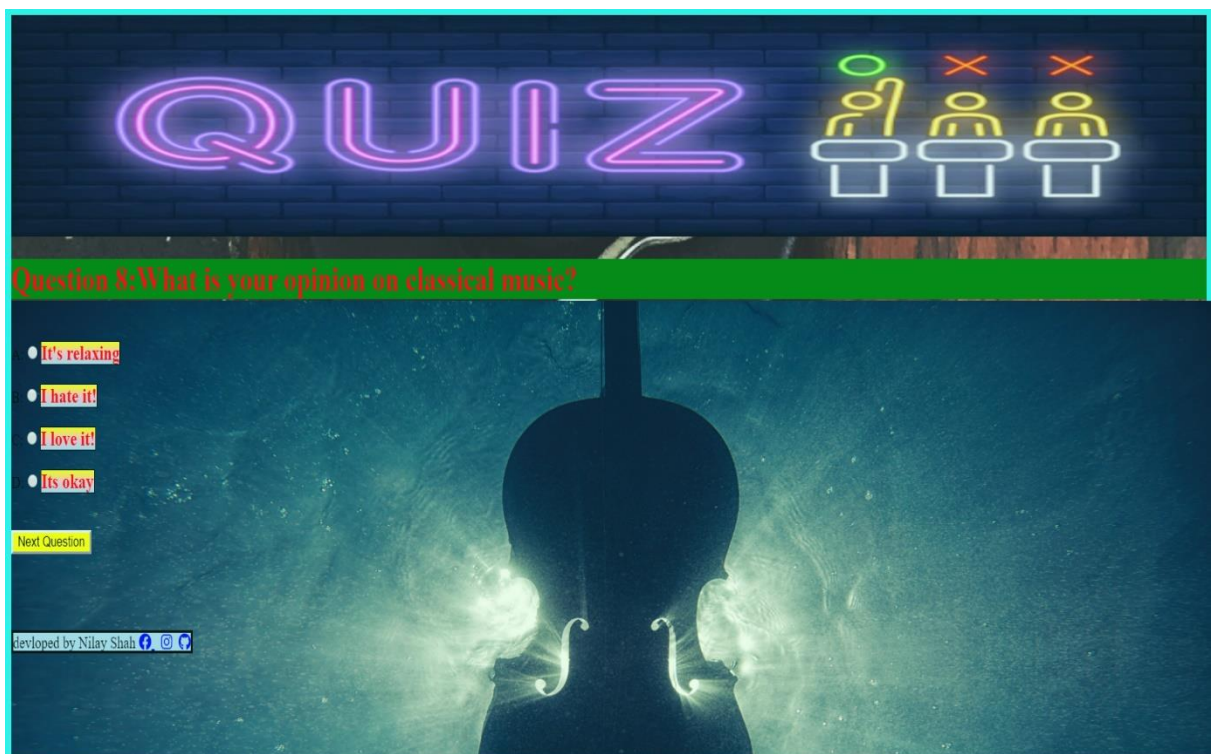

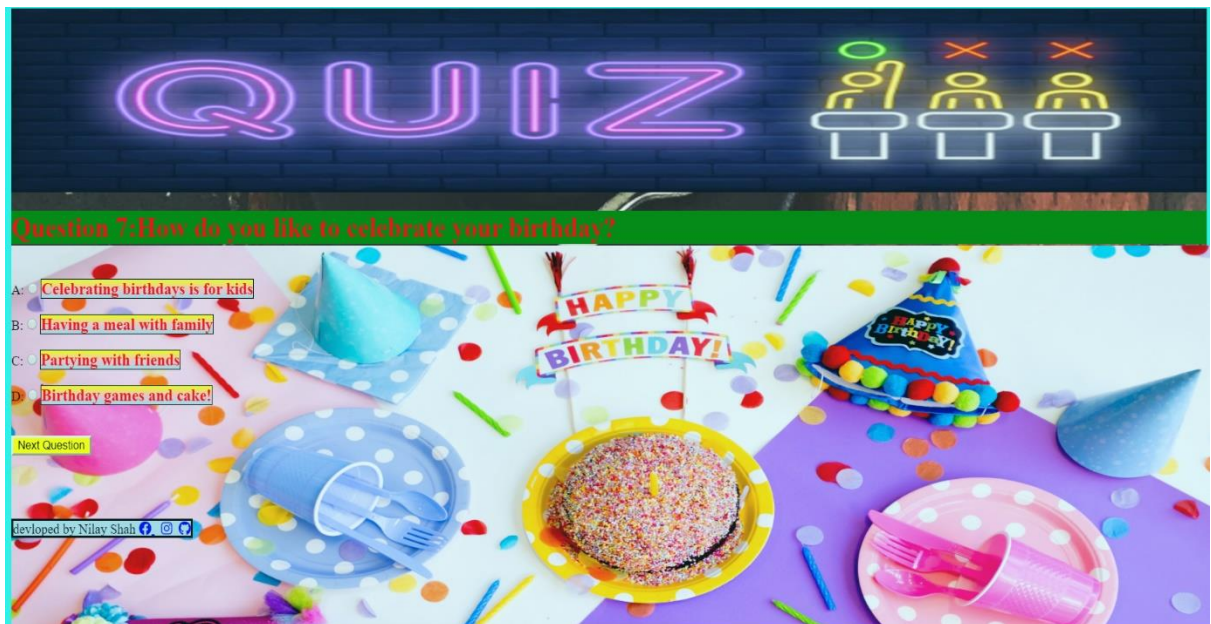

- Loading for great user experience.
